

# MESH+

DECENTRALIZED NETWORK FOR THE IoT  
USING THE BURN-EQUILIBRIUM TOKEN MODEL

TOKEN  
MESH+

TOKEN  
NUC

**TOTAL SUPPLY = 300 000 000 Mesh**

# Two Token System

**MESH+** token is a cryptocurrency earned when antennas provide wireless coverage and transfer data over the network.

**NUC** tokens are used by devices to send data on the network.

NUC tokens are created by burning MESH+ tokens, are non-exchangeable, and tied to a single user.

# Token distribution

# Token distribution

**Seed Round: 51 000 000 Mesh (17%)**

## **Unlocking Schedule:**

- Start Unlocking – 3 months from exchange listing, 1% unlock;
- End Unlocking – in five years. Token shall be unlocked daily.

## **Vesting Schedule:**

(from emission fund on unlocked tokens):

- 0,3% from exchange listing month until end of low income period.

**Seed Investors** automatically get the share in the stake of income (45%).

**TGE1 round: 2 000 000 Mesh (0.66%)**

**TGE2 round: 800 000 Mesh (0.27%)**

## **Unlocking Schedule:**

- Start Unlocking – 8 months from exchange listing;
- End Unlocking – in five years. Token shall be unlocked daily.

## **Vesting Schedule:**

(from emission fund on unlocked tokens):

- 0,1% from exchange listing month until end of low income period.

**TGE Investors** automatically get the share in the stake of income (5%).

# Token distribution

**Team: 38 700 000 Mesh (12.9%)**

## **Unlocking Schedule:**

- Start Unlocking – 5 months from exchange listing, 1% unlock;
- End Unlocking – in five years. Token shall be unlocked daily.

## **Vesting Schedule:**

(from emission fund on unlocked tokens):

- **0,05%** from exchange listing month until end of low income period.

**Team** automatically get the share in the stake of income (**10%**).

**Miners Pool: 58 490 000 Mesh (19.5%)**

## **Unlocking Schedule:**

No locking.

## **Vesting Schedule:**

- **20%** of antenna price from test period until end of low income period
- **15%** from the end of low income period during 5 years
- **5%** during next 5 years
- **3%** until the end of product functioning

# Token distribution

**Marketing: 30 000 000 Mesh (10%)**

**Unlocking Schedule:**

- Start Unlocking – 3 months from exchange listing;
- End Unlocking – in ten years.

**Development &  
Operations: 45 000 000 Mesh (15%)**

**Unlocking Schedule:**

- Start Unlocking – with exchange listing;
- End Unlocking – in ten years.

**Stake Rewards  
Pool: 44 010 000 Mesh (14,67%)**

**Exchange &  
Liquidity: 30 000 000 Mesh (10%)**

# STAKING

## Initial MESH Distribution from Network Income

### Mesh Inc. & Seed Investors (45%)

Assigned for Seed Investors and Mesh Inc., who governed.

### TGE & Late investors (5%)

Assigned for TGE investors and speculators who wants participate in staking by submitting of MESH tokens.

### Miners (20%)

Rewarding for participating in network and creation of antennas coverage.

### Burn (30%)

# Final distribution (60 years)

**Mesh Inc. & Seed Investors (30%)**

**TGE & Late investors (45%)**

**Miners (20%)**

**Burn (5%)**

# Burning and Rewards

All **NUC** shall be burned and corresponding number of tokens shall be added to the emission and rewards pool.

It will retain equilibrium regarding the volume of traffic and buying of IoT devices service.

Corresponding rewards shall be transferred to the stakeholders.

Over time, the number of burned tokens decreases with increasing total turnover of the tokens number.
